

Installation Instructions For Safety Chain

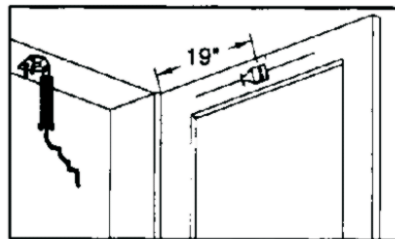

Step 1

Attach bracket on *spring end* of chain to **head jamb**, 18" from hinge side of side jamb. Note: Mount this bracket at approximately 45° on head jamb with chain facing hinges.

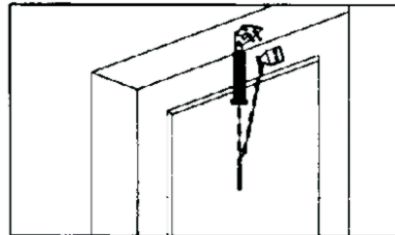

Step 2

Mount other bracket on **top of door** 19" from hinge edge of door in horizontal position with T-shape of bracket on hinge side. This allows 90° opening of door. If greater opening is desired, mount each bracket slightly closer to hinge edge of door. To allow full opening or removal of door, merely detach chain from bracket.

Step 3

To attach hold-up spring, close door and hook spring to lowest hanging link.

Step 4

Pull spring up toward hinge side of door and attach to **head jamb** with nail, about 3" from side jamb.
